

## **Biomedical Library Addition & Renovation**

### **Journals Move to the Annex**

During summer 2003, the Biomedical Library will move most of its journal volumes published before 1993 to the UCSD Libraries Annex, an offsite storage facility. This move is in preparation for the upcoming construction of an addition to and renovation of the Biomedical Library.

The volumes being moved will remain in the Annex for the duration of the construction, currently scheduled to be completed in mid-2006. We will page materials back from the Annex on request daily, Monday through Saturday.
