University of California, Center for Marine Affairs

UC Center for Marine Affairs Records, 1957-1979

BULK DATES: 1970-1975

PHYSICAL DESCRIPTION: 6 record center cartons; 21 audiocassette tapes

DESCRIPTION: The collection consists of correspondence, annual reports, proposals, progress reports, financial and personnel files, copies of legislation and unpublished papers and other material documenting the work of the Center for Marine Affairs from its founding date in 1970 to 1979. The collection consists largely of the files of CMA Directors Warren Wooster (1970-1972) and Gerald L. Wick (1972- ). The file also includes extensive material from Milner Baily Schaefer, and John Dove Isaacs, Directors of the Institute of Marine Resources. The collection was received with some file folders out of order. A sheet entitled "Center for Marine Affairs Filing System" (below) was received with the collection. The arrangement of the collection was refined to reflect this system. However, since relatively few of the folders had file codes as part of the folder title, it is difficult to ascertain whether this arrangement was the original one. 21 cassette tapes which record the CMA Workshop: "Coastal and Marine Resource Management and Utilization in Baja, California," (November 3-6, 1974) were filed with the workshop files. These tapes record the Workshop in English (11 tapes) and in Spanish (10 tapes). Unsorted documents are filed at the end of Box 4 and in Box 5 of this collection. The documents include material generated by the U.S. Government and the governments of France and Mexico. This material includes UNESCO material on oceanography and copies of papers presented at various seminars. The documents are not arranged in any order, although some are in folders. The documents concern international law of the sea, oceanographic research, fisheries, marine life and scientific research.
