SCRIPPS INSTITUTION OF OCEANOGRAPHY ARCHIVES

Leipper, Dale F. 1914-

Dale F. Leipper Papers, 1937 – 1994

PHYSICAL DESCRIPTION: 1 mss

DESCRIPTION: This collection contains "Letters from Oceanographers," copies of letters written by SIO oceanographers as part of a letter exchange over the years 1948-1991. According to Dale Leipper, the participants "started as a Scripps alumni group who considered Harald Sverdrup to be their mentor in the late 40s," and include some close associates. The letters describe the writers' careers in oceanography, along with family and personal information. Letters were sent to Dale Leipper, who copied them and distributed a set to each participant. There are fifteen sets of letters, compiled annually from 1948 through 1958, and in 1965, 1967, 1977, and 1991. Forty-nine oceanographers took part; Harald Sverdrup, Walter Munk, Robert S. Arthur, John Lyman, Henry M. Stommel, and Warren Wooster were regular participants. Also included are biographical information on Dale Leipper, Leipper's class notes from physical oceanography courses taken with Harald Sverdrup in the 1940s, and Leipper's essay, "The 1940s on the Campus of the Scripps Institution of Oceanography, Some Notes and Comments by an Involved Graduate Student; Mostly About Physical Oceanography. "
