Scripps Institution of Oceanography

Scripps Institution of Oceanography Cruise Data, Southern California Bight Study, 1975-1978

Physical Description: 2 manuscript boxes and 5 oversize gray boxes

Description: The accession consists of original raw data for the Southern California Bight Study (SCRBS) documenting SCBS Cruises 1-15, 1975-1978. The data includes STD, oxygen and hydrographic data, Niskin casts and other data. The data is largely in paper form, but the accession includes one reel of magnetic tape.

The University of California Institute of Marine Resources initiated a study of the Southern California Bight in September 1974. A series of cruises was organized to take hydrographic measurements.

Copyright held by UC Regents

Acquired March 27, 2007. This accession was found in Seaweed Canyon, in the same Quonset hut that housed the SIO Cruise Data before it was transferred to Scripps Archives

Southern California Bight (Calif. and Mexico)
